

It's been a long day, a hard day, a tough week  
I'm just about losing my strength  
But I keep pushing on, try to stay strong, move along and try my best  
To start all over again  
The trouble is it's been too many years and this is a waste of my blood, sweat and tears  
And time is running out, it's running out

I've got my doubts but I think that we can work this out  
Head out of the clouds, I think we're seeing clearly now  
I know we're gonna make it somehow

**We've got a life to build, we've got a light to find, I feel it getting closer  
We've got to find the will, we've got to free our minds  
And strive for what we hope for  
You and I, we're gonna try, gonna try, gonna try  
We're gonna try, gonna try, gonna try**

Where did we get this fear that we should work and never live?  
Why stop us here when we've got so much to give?  
Sometimes it's not enough, it's not enough

I've got my doubts but I think that we can turn this around  
If we can figure this out nobody can stop us now  
But I know we're gonna make it somehow

**We've got a life to build, we've got a light to find, I feel it getting closer  
We've got to find the will, we've got to free our minds  
And strive for what we hope for  
You and I, we're gonna try, gonna try, gonna try  
We're gonna try, gonna try, gonna try**

We're gonna try, we're gonna try, we're gonna try  
We're gonna try, we're gonna try, we're gonna try  
We're gonna try, we're gonna try, we're gonna try

**We've got a life to build, we've got a light to find, I feel it getting closer  
We've got to find the will, we've got to free our minds  
And strive for what we hope for  
You and I, we're gonna try, gonna try, gonna try  
We're gonna try, gonna try, gonna try**
